# ENTERPRISE STREAMING PLATFORM™

**Fully Managed, Massive Scale Streaming Platform**

Eventador's ESP simply and quickly paves the way for democratizing data throughout the enterprise by using distributed log technologies as your enterprise data bus. With a secure, unified platform for managing critical streaming data processors, all with 24x7x365, hands-on support, Eventador ESP is deployed in your preferred cloud account and combines Apache Kafka® and Apache Flink® for a truly powerful and comprehensive streaming solution.

Eventador Enterprise Streaming Platform™

## Powerful Apache Flink Cluster Management

Eventador's ESP—available in global AWS regions—delivers seamless integration between Apache Kafka, Apache Flink, and an entire ecosystem of sources, sinks, and connectors. Deployed in your cloud account and VPC peered to your streaming applications, Eventador offers an elastic, pay-as-you-go method to fit nearly any budget needs.

## Extensive Team Management

Managing teams within Eventador's ESP is as easy as setting a team administrator who can invite users, set access levels, and grant and revoke privileges.

## Robust Savepoint Management

Eventador's ESP delivers extensive savepoint management features for easy and seamless deployment and upgrade of processors.
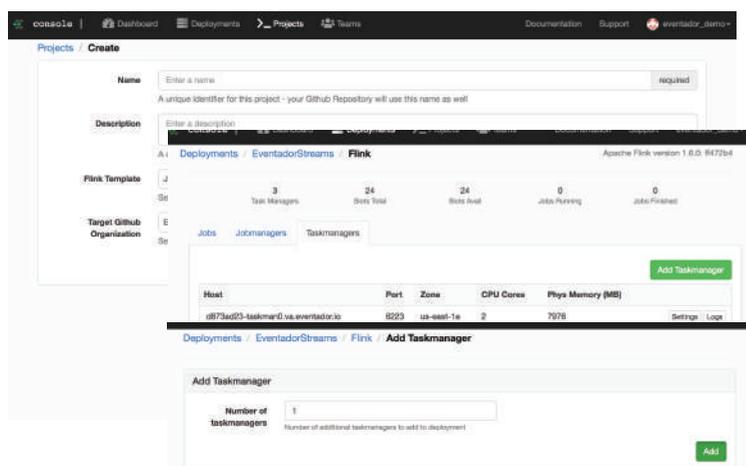

## Simple Authoring and Deployment of Java and Scala Jobs

With Eventador's ESP, you can quickly and easily author and deploy jobs in both Java and Scala. Eventador provides templates that make it easy to get started and build more complex processors and computations. Eventador also delivers rich tooling and complete SDLC integration.
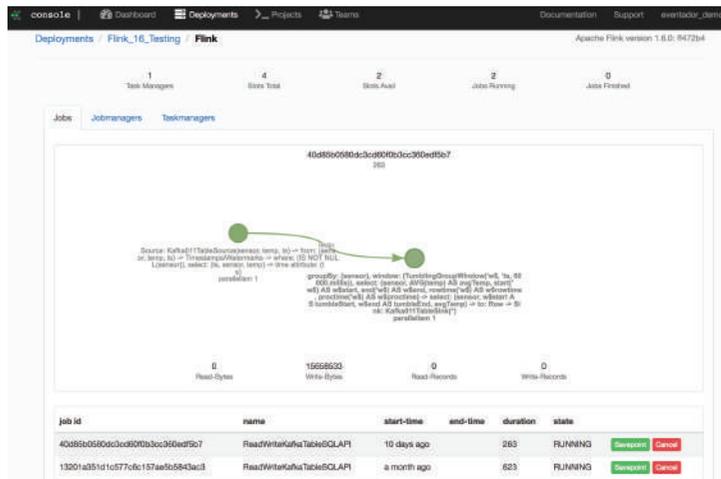

## Clear Project Creation and Management

Eventador's ESP, with simple integration to Github, enables users to easily create, build (maven), deploy, monitor, and scale jobs with a single push of a button.
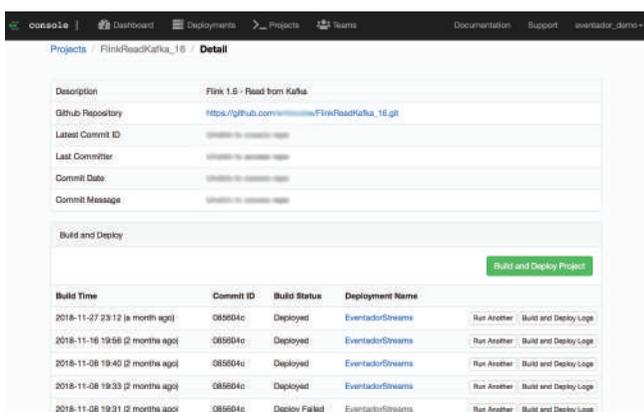

*Creating and scaling projects via the Eventador Console:*

*Managing Apache Flink deployments:*

*Managing and deploying Apache Flink projects:*

*Authoring and managing jobs in Java or Scala:*

***Eventador.io has delivered! They provide an industrial Kafka service with the very latest in SQL and stream processing frameworks. Their customer service is second to none.*** *~ Elliot Starin, Founder/CTO at Mantis Networks*

Eventador is the first fully managed platform to democratize data across the enterprise in a secure, unified and self-service manner. By deploying streaming cluster and the associated connectors, endpoints and more with the simple push of a button, users are not forced into specific streaming configurations. Instead, they build and deploy a platform that directly fits their needs.

The 24x7x365, hands-on, expert support means not worrying about massive man hours to update, optimize or troubleshoot the stream processing platform. We work directly with you to ensure that everything is operating smoothly at all times.
